

Foundation-1 | Clean Energy Migration

Powering agriculture from farm to shelf without the capital burden.

Contact: Karman Kekana | karman@foundation-1.co.za | +27 69 811 7112 | Foundation-1 | 2026/138664/07

Guaranteed 60% savings with Awaken wheeling.

Awaken delivers guaranteed 60% savings; solar wheeled from a 56MW farm to your premises through a simple tariff switch.

Eden, our on-site solar PPA, saves up to 35%. Fully financed by Nedbank CIB.

No infrastructure purchase. No installation, maintenance or insurance cost.

Just a new energy tariff that cuts operating costs and future-proofs the business.

Awaken is underwritten by a 56MW solar asset in Matjhabeng, Free State Province.

A new **operating reality** for agribusiness.

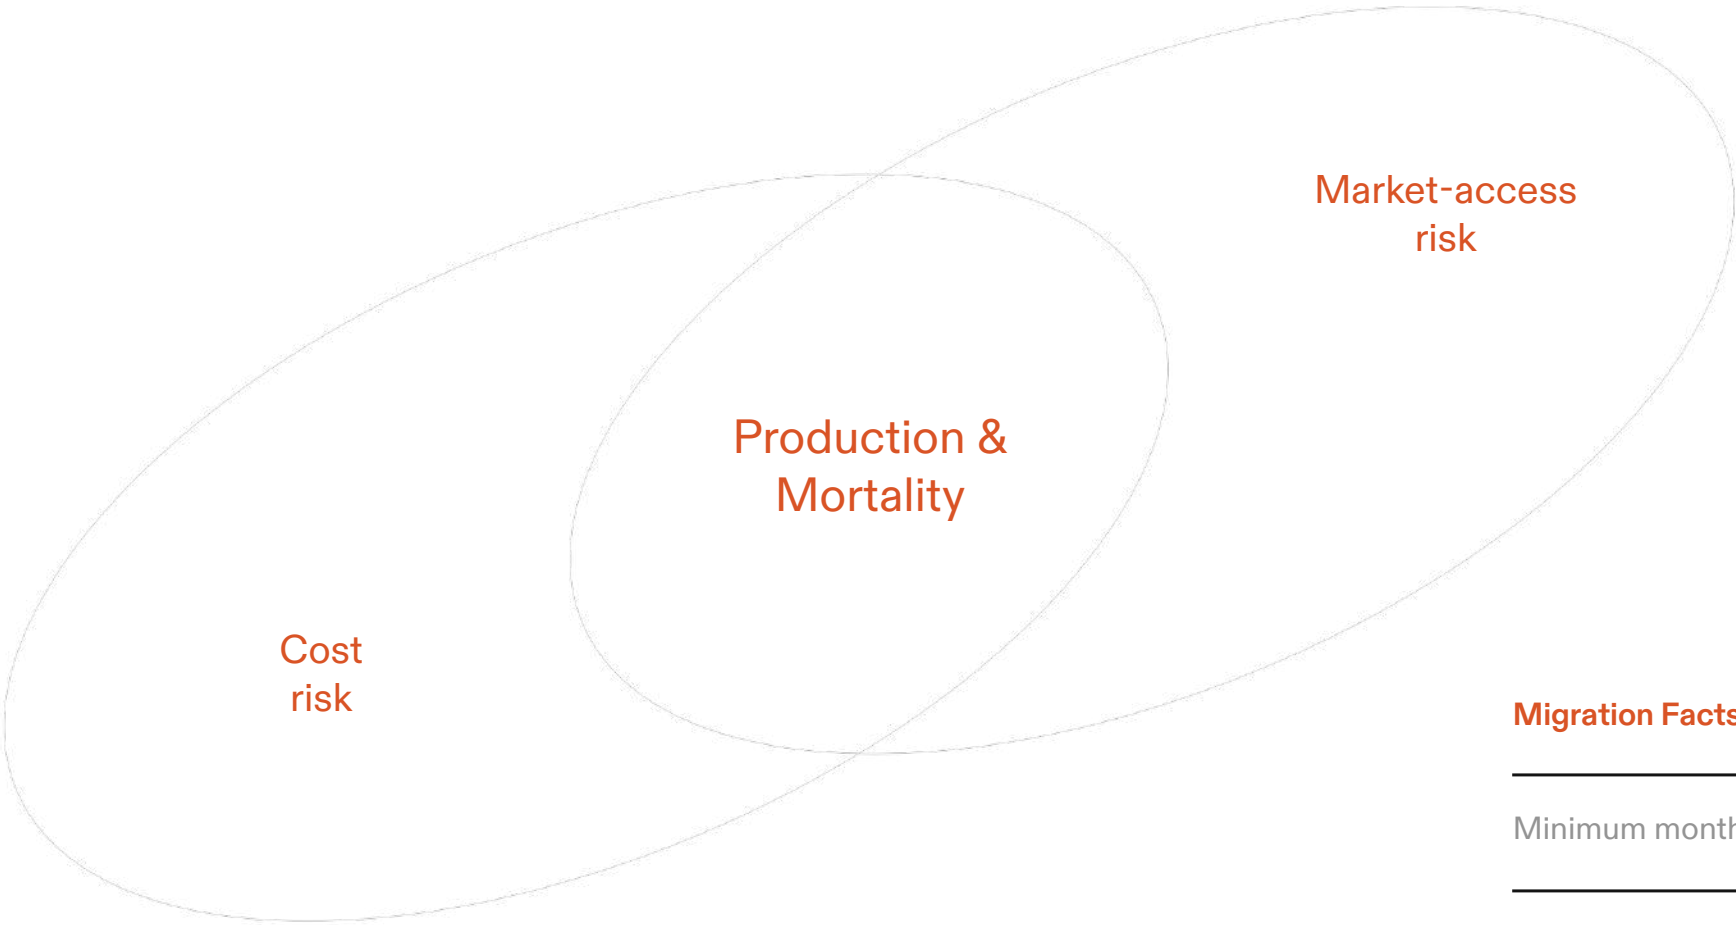

Agribusinesses are entering a new operating reality. Electricity is no longer just a monthly expense; it is a margin risk, a mortality risk, a production risk, a finance risk, and soon, a market-access risk.

Foundation-1 helps agribusinesses migrate to cleaner, cheaper energy through a simple tariff switch under a new Power Purchase Agreement at no cost.

Agriculture is fighting an **operating-risk** stack.

Energy is becoming a finance issue, production issue, procurement issue, export-readiness issue, and long-term competitiveness issue.

Rising tariffs · load shedding · diesel backup costs · voltage instability · cold-chain interruptions · irrigation disruptions · ventilation failures · mortality risk

Migration Facts

Minimum monthly utility bill to qualify	R10k
Months of utility bills to apply	6
Infrastructure, installation, maintenance, insurance	R0
60% Guaranteed savings with Awaken and up to 35% with Eden	60%

The next buyer will **care** how it was **produced**.

Banks, retailers, exporters and large buyers are starting to ask:

Can this business keep operating during energy disruption? Are its input costs stable? Is it reducing carbon exposure? Can it prove cleaner production?

Cleaner production will influence who gets financed, who gets preferred by buyers, who enters export channels. Foundation-1 helps agribusinesses move before this pressure becomes mandatory.

Does it fit a lower-carbon supply chain?	Can it prove cleaner production?
Are its input costs stable? Is it reducing carbon exposure?	Can this business keep operating during energy disruption?

Energy migration through Eden or **Awaken**.

- The client does not need to fund or manage the infrastructure. Foundation-1 manages the migration pathway.
- The agribusiness moves onto a new tariff. Savings come from the difference between the old energy cost and the new energy structure.

Eden

On-site solar PPA · save up to 35%.

Awaken

Wheeling from a 56MW solar farm · guaranteed 60%.

PPA Model

Access cleaner energy without buying the system.

The savings case: a major cost reset

Savings can be redirected into production, growth, working capital, equipment, feed, labour, cold-chain resilience and market access.

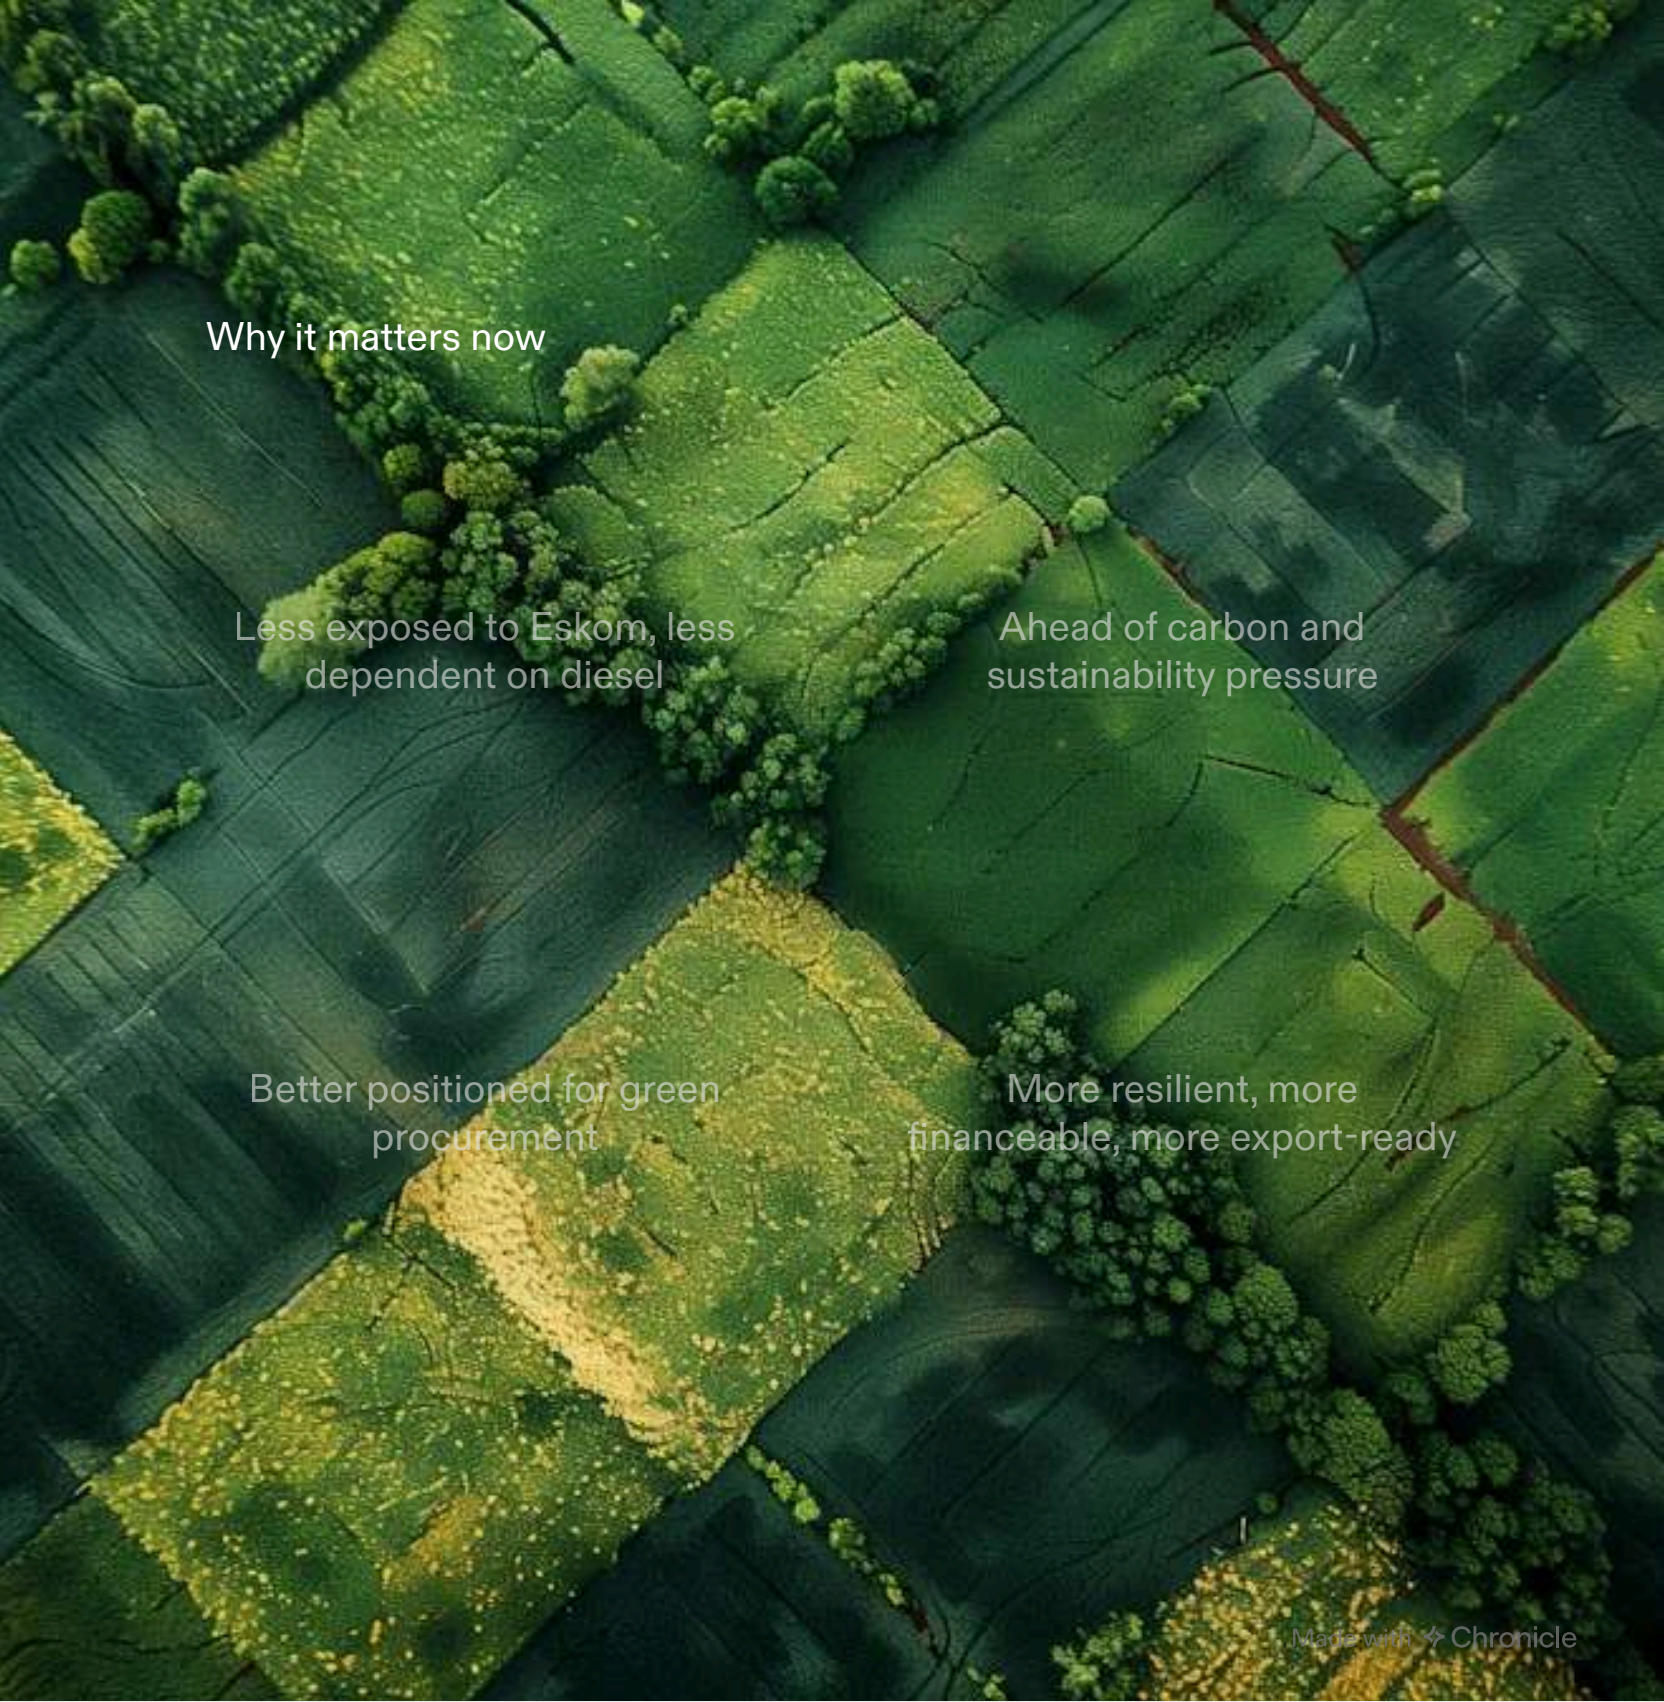

Product	Eden	Awaken
Structure	On-site solar PPA	Wheeling from a 56MW solar farm + onsite Solar
Savings	Up to 35% savings	60% guaranteed savings (if business qualified)

Democratising energy for the agriculture value chain.

Clean energy should not be reserved for the biggest players.

We are democratising energy migration for the agriculture value chain accessible from companies with a R10,000 per month in utility spend.

Infrastructure, installation, maintenance or insurance cost	R0
Guaranteed savings with Awaken	60%
Minimum monthly utility bill to qualify	R10k

Why it matters now

Less exposed to Eskom, less dependent on diesel

Ahead of carbon and sustainability pressure

Better positioned for green procurement

More resilient, more financeable, more export-ready

Qualifying starts from a minimum monthly utility bill of R10,000. The client does not manage the complexity, Foundation-1 does the work.

Built for the full agricultural value chain.

WHO QUALIFIES

Poultry farms · dairies · piggeries · packhouses

Cold storage · feed mills · irrigation-heavy farms

Agro-processors · abattoirs · exporters · cooperatives

OUR ROLE

The Foundation-1 advantage

We assess your bills, model the savings, structure the PPA and coordinate the migration.

One migration pathway

Energy structuring, project coordination and savings modelling in one process.

You stay focused on production

Foundation-1 does the work, not the client.

How to **start.** Savings from **day 1.**

Steps 1-2 — Estimate & account

- Create a live estimate at foundation-1.co.za/pricing
- Set up your Foundation-1 account
- Your migration profile is created

Steps 3-4 — Bills & EOI

- Sign a non-binding Expression of Interest
- Provide your latest 6 months of utility bills
- Foundation-1 prepares a formal migration proposal

Steps 5-6 — KYC & site plan

- Simple KYC verifies the business
- Site inspection of your operation
- Installation and migration plan prepared

Steps 7-8 — Migration & savings

- Migration via Eden, Awaken or Eden + Awaken
- The business moves onto the new tariff
- Savings start from Day 1

Save and stay ahead of the market.
